

SELF TAPE GUIDANCE

SYP 2026

Hello from the team here at VCL, we are so excited to see your self-tape!

TECHNICAL INSTRUCTIONS

Please film yourself using a smart phone or camera following the instructions below:

- Film in landscape
- Make sure that you are well lit (avoid having a window behind you)
- Check that your voice is audible to the microphone on the device and that there's not too much background noise from a busy road or other noises in a busy family home

FILMING INSTRUCTIONS

Each step of the tape can be filmed separately, but please edit them together with your phones software or an app like CapCut so you only submit one tape

- **Introduction** - state your name and age to camera and your experience, you can also state what role you think best suits you
- **Song** - record yourself singing the audition song 'I'm a Believer', we want to hear your voice here but also how you act through song so consider a character and how they would deliver the song
- **Scene** - record a scene of your choosing from the scene selections, you should only read one character with someone else (off-camera) reading the other lines for you, really bring the scene to life and give us a performance that will fill the theatre, we are looking for strong choices and a big voice, we don't need a perfect interpretation (that's what rehearsals are for).

SONG AND SCENES

All the resources including the lyrics, backing track, and scene selections can be found on the link below, using the password **SYP26!**
